with all new Trends

PROFILE

Senior Tech Lead with 15 years in technology, leading 18-member engineering teams and driving product-led scaling decisions across platforms.

WORK EXPERIENCE

- ICICISecurities** 2021 - PRESENT
Senior Technical Manager-AVP
 - Multi-Project Technical Leadership** - Leading 7 parallel projects across AI platforms, trading systems, and social networks for traders, driving architecture, delivery, and cross-team alignment.
 - People & Delivery Management** - Managing 18 engineers across mixed skill levels, ensuring velocity, quality, accountability, and on-time releases in high-pressure environments.
 - Full-Stack & Platform Expertise** - Hands-on across PHP, MySQL, LAMP, Go, .NET, Oracle, with strong command over system design, integrations, performance, and scalability.
 - Product-First Execution Mindset** - Scaling products with a Product Manager's lens: prioritization, roadmap ownership, stakeholder alignment, business impact, and continuous improvement.
- 3i-Infotech** 2012-2021
Fullstack Developer | Tech Lead
 - Sole Full-Stack Engineer & Owner:** Independently architected, developed, deployed, and maintained end-to-end systems using PHP, MySQL, and Linux, owning everything from backend logic to production stability.
 - Security, Stability & Operations Lead:** Personally handled server management, security patching, performance tuning, database design, and incident resolution, ensuring secure, scalable, and always-on systems without external dependencies.
 - Product Direction & Customer Impact:** Drove feature strategy, customer-driven enhancements, and continuous product evolution, balancing development, support, and roadmap decisions to directly improve adoption and business value.
- NeoSoft** 2011-2012
Senior Software Engineer
 - Deep PHP Engineering Expertise:** Hands-on experience delivering and scaling multiple PHP MVC applications using CodeIgniter, combined with extensive Core PHP development—owning architecture, performance optimization, security hardening, and complex business logic across diverse domains.
 - CMS & Theming Mastery:** Strong command over Drupal and WordPress, with substantial experience in custom theming, template architecture, and plugin/module customization, enabling rapid delivery of high-quality, brand-consistent, and performance-optimized web solutions.
